Subject: RE: Possum Pt - Outfall 010 sample 2/8/16

Dana,

Use the 010 results.

The limits took effect after this sample date. That's why we fast tracked a temporary plug of 010.

We will be including two attachments with toe drain only results and an explanation of the 010 discharge and a reason the chronic toxicity was not sampled.

Do you want me to use the results for 010 or the Pond D toe drain? If we use 010 results, pH and copper are out of our limits.

Dana

Dana,

Use the Excel spreadsheet for the 010 eDMR. Save the other two attachments for reference and future inspections. GAI will be sending me a name to put in the 010 page.

I will attach the toxicity report to the eDMR.

This will be the last discharge report for 010. Future eDMR pages for 010 will need to be checked "No Discharge".

Ken / Jeff,

Attached are the complete results for the:

- 4-hr manual flow composite samples collected on 2/8/16 for metals, and
- 24-hr manual flow composite samples collected on 2/8 and 2/9/16 for acute toxicity.

Acute toxicity results are good for both the UV and non-UV treated samples. I attached the acute toxicity lab report.

Sincerely,

John D. DeBarbieri, P.E.

Ken / Jeff,

Regarding the below tabulated results for the Pond D Toe Drainage; we added the results of the Pond D Toe Drainage sample (4-hr manual flow composite) also collected on 2/8/16. Please refer to the attached.

Sincerely,

John D. DeBarbieri, P.E.
